Welcome to [GreenTRIP Connect](#). Connect helps you instantly calculate how smart location, affordable homes and traffic reduction strategies can reduce driving and greenhouse gas emissions from residential development. It also calculates how much money and space can be saved from right-sized parking.

Q: Why does the unit field auto-fill?

A: Once you pick a parcel Connect uses that parcel's county to auto-fill the "average" building size in that county by unit count. This is also how the building defaults are auto-filled in "Customize Units" drop-down. Mix of Unit sizes by bedroom and average rents are based on PUMS data for this county.
